

US Atlas & Facilities at BNL

Bruce Gibbard

21-July-99

FY '99 US Atlas Facility Support at BNL

- BNL LDRD-like funding available for FY '99
 - Equipment - **Described later**
 - System Administration Position
 - **Open and recruiting in progress**
 - Management & Additional Sys Admin position - **Needed**
- Aligned use of established RHIC computing infrastructure
 - Physical site
 - Networking
 - OS/Environment support

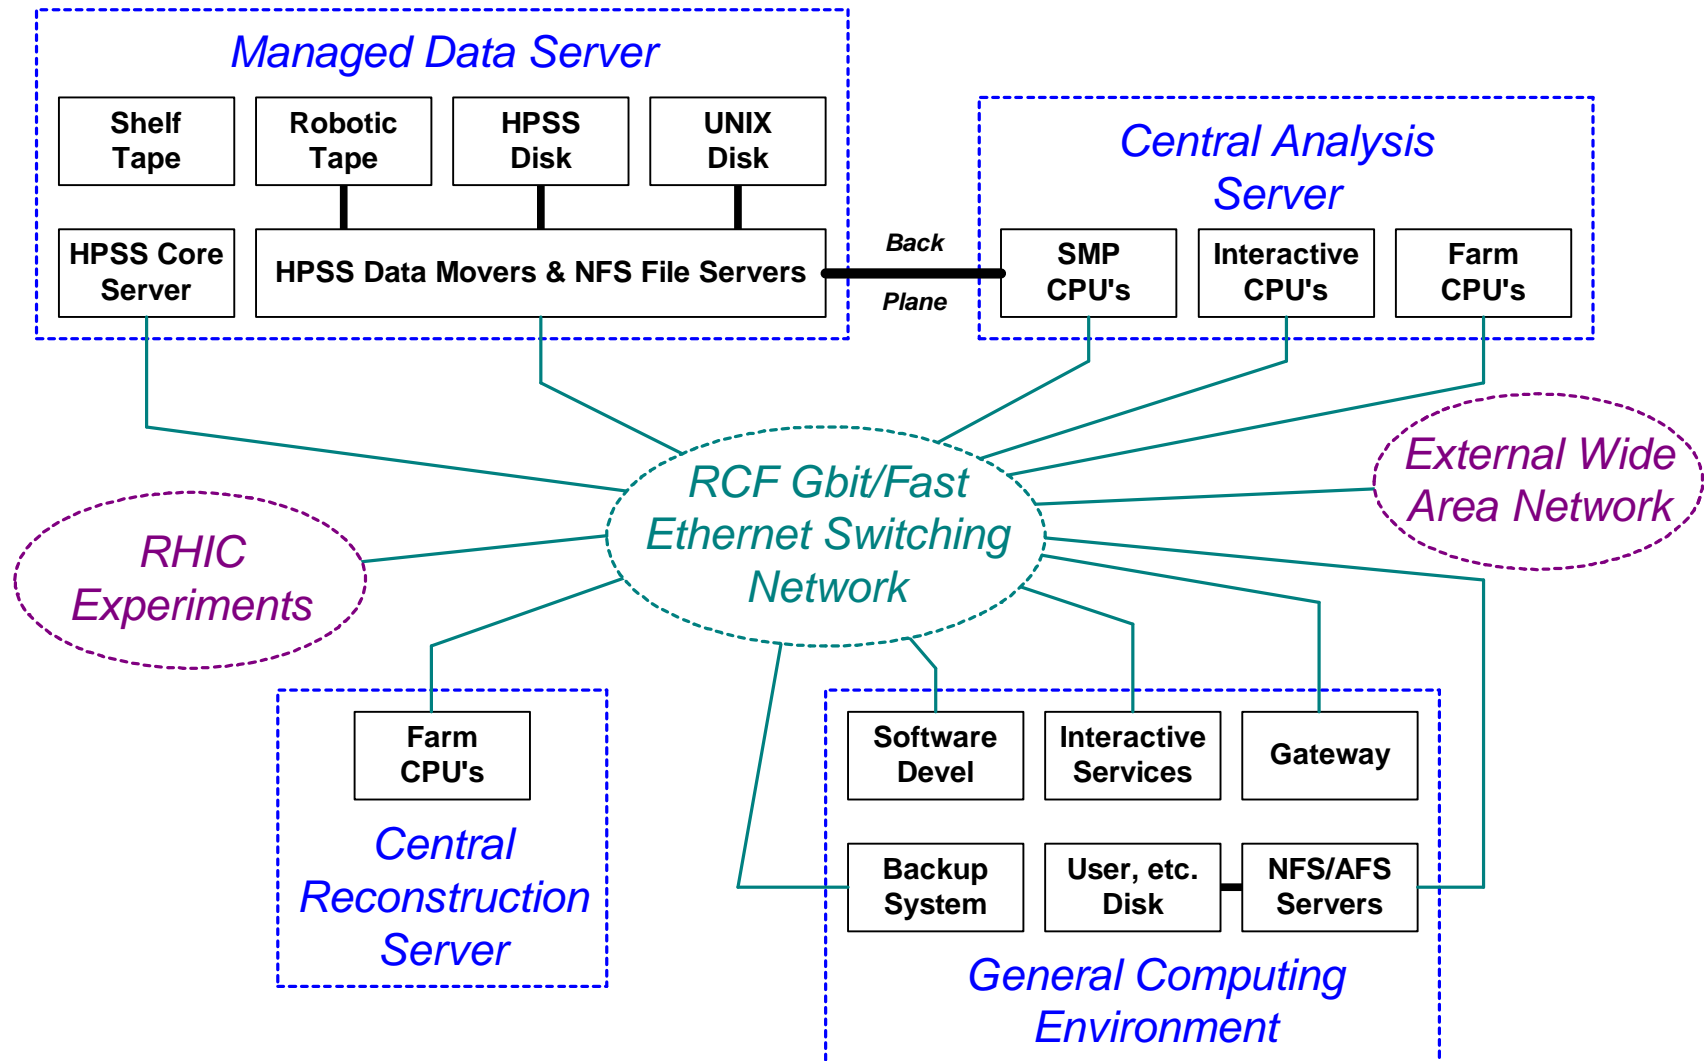

RHIC Computing Facility (RCF)

- Dedicated Facility With Strong User Participation
 - Principle component of Wide Area multi-site RHIC computing plan
 - User developed requirements document
 - User participation in initial planning
 - Quarterly 2 day User meetings
 - Plans and Progress
 - Requirements revisions
 - Technology discussions
 - Weekly liaison meetings
 - Ad Hoc topical task forces/working groups
 - User participation on facility advisory committee

RHIC Computing Facility (Continued)

- Principle Hardware Components
 - Platforms - Linux/Intel and Solaris/Sun
 - Tape/Robotics - StorageTek: SD-3, 9840 / Silo
 - Network - Fast/Gigabit /Large Frame Gigabit Ethernet
- Infrastructure Tools
 - HSM - HPSS +
 - Databases - Objectivity, Oracle, MySQL
 - WAN Code/Data Distribution - AFS
 - Resource management (batch) - LSF +
 - Data Mining - HENP Grand Challenge +

RHIC Computing Facility

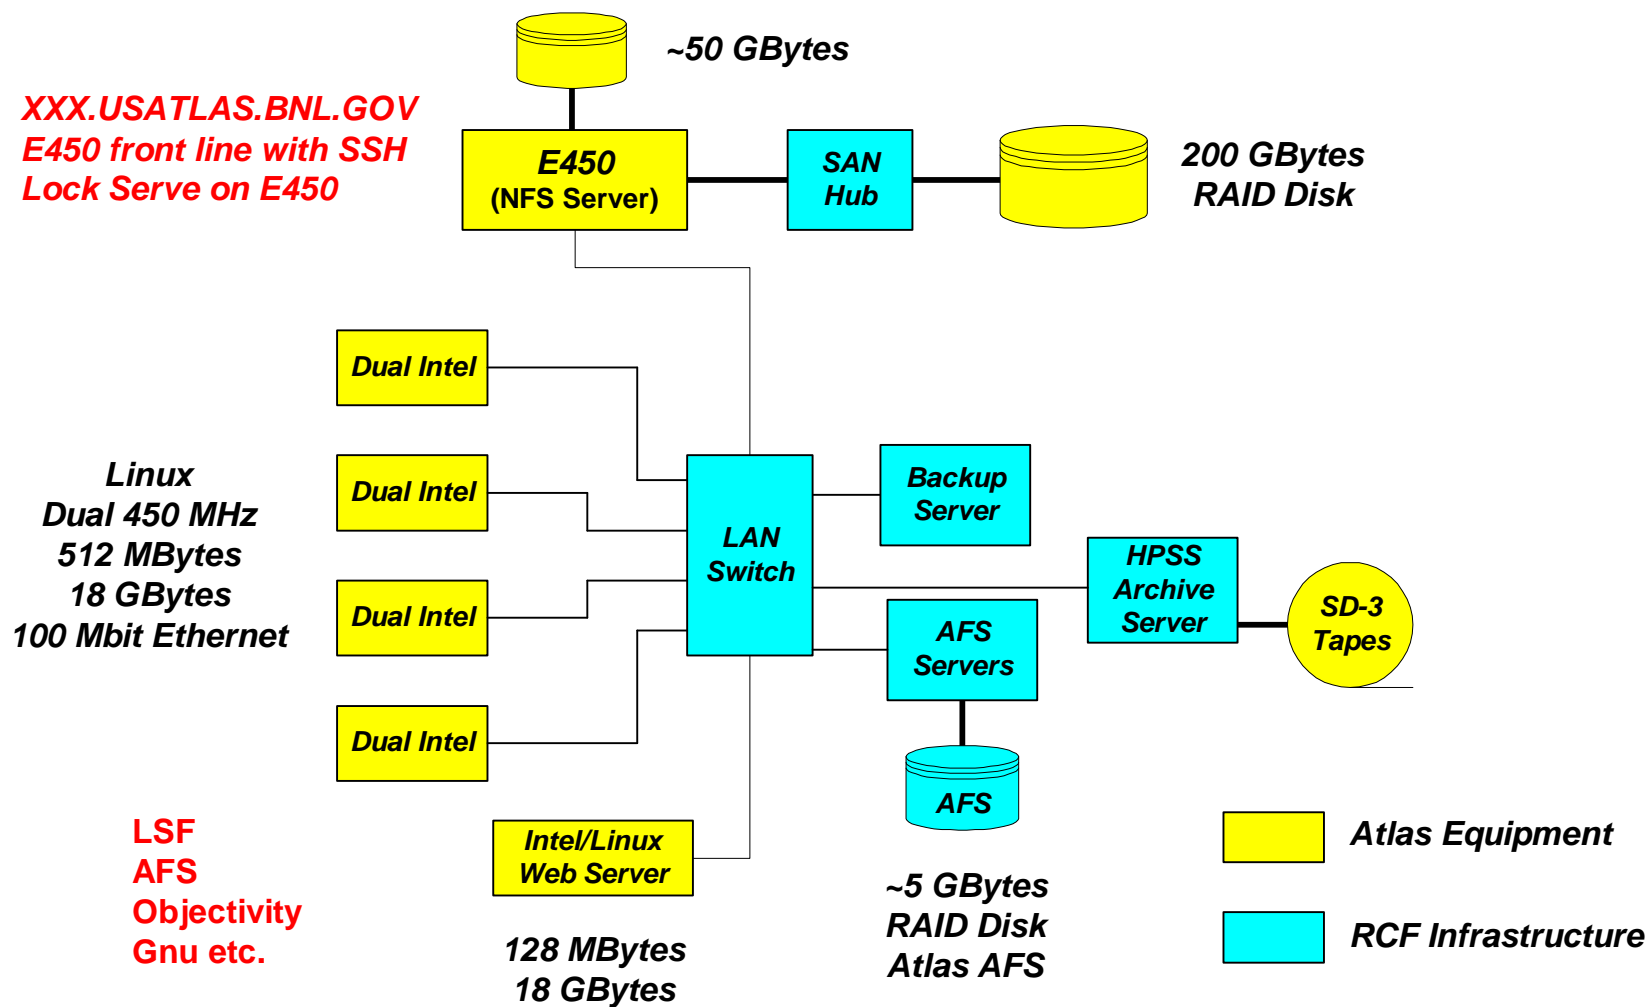

Facility Upgrades 7-8/1999

	RCF May '99	RCF Sept '99	US Atlas Aug '99	US Atlas FY '00 (Suggested)
Intel/Linux Farm				
<i>Boxes</i>	59	203	4	50
<i>CPU's</i>	136	424	8	100
<i>SPECint95's</i>	1,700	7,000	300	2,000
Data Disk				
<i>Volume (TB)</i>	1.6	9	0.2	1.2
<i>Disk Technology</i>	JBOD	RAID 3/5	RAID 5	RAID 5
<i>Disk Connectivity</i>	SCSI	FibreChannel	FibreChannel	FibreChannel
Tape System				
<i>Robotic Capacity (Tapes)</i>	6,000	6,000	Small	Small
<i>SD-3 Drives</i>	10	11	Small	0
<i>9840 Drives</i>	0	10	0	2
Data Server Systems				
<i>HPSS CPU's</i>	4	16	0	0
<i>Solaris CPU's</i>	6	22	2	4
<i>Connectivity</i>	Fast Ethernet	Gigabit Ethernet	Fast Ethernet	Gigabit Ethernet

Atlas at BNL

Near Term (August '99)
Computing Facilities

US Atlas Computing

- Current Ad Hoc Deployment of Computing Facilities Is Not Long Term Viable
- Specification of the Requirements for US Atlas Computing Facilities is Needed Soon
- Development of Facilities Plan Further Requires
 - Understanding of funding sources & constraints
 - DOE, NSF
 - Understanding of relationship between US Atlas computing and other Atlas computing components
- Computing Facilities Plan Includes
 - Tier 1, Tier 2, Institutional, Desktop, & Network

US Atlas Computing

- Facilities Session Tomorrow Will Go into More Depth on These Issues
- Following this talk:
 - Srini Will Next describe the Computing Environment Established on Exist Equipment
 - Then Short Tour of RHIC Computing Facility Will Be Available for Those Interested
